The counts and rates of occurences of defects reflected in this report are based on the Indiana Birth Defects & Problems Registry Data. Only those conditions which have been confirmed or which have been determined to be highly probable by the Chart Audit Process are included in the data. This report is based on real time data and subject to change based on additions and corrections to the data.

Note—Rates based on fewer than 20 cases are unstable and are not comparable.

Data compiled on 10/22/2007.
